

Safety Instructions
for glass fireplaces or products that use organic ethanol or burn gel

THE DECORATIVE FIREPLACES MADE BY JONA FIRE ARE ONLY TO BE USED AS RECOMMENDED BY THE MANUFACTURER, THAT IS, THEY ARE ONLY TO BE USED AS DECORATIVE PIECES IN INDOOR OR OUTDOOR AREAS. FIREPLACES THAT ARE NOT PROTECTED BY THE PROVIDED JONA FIRE GLASS CYLINDERS (FOR EXAMPLE, TORCHES, FIREPLACES AND FIREBALLS) ARE ONLY MEANT TO BE USED OUTDOORS AND REQUIRE A SAFE LOCATION. THE OUTDOOR PRODUCTS CAN ONLY SAFELY BE USED WITH OUR "JONA-GEL" (**NOT** WITH OUR PURE, ORGANIC ETHANOL "FIANOL")! THE DECORATIVE FIREPLACES ARE NOT MEANT FOR USE IN HEATING A ROOM. JONA FIRE IS NOT RESPONSIBLE FOR DAMAGES THAT OCCUR AS A RESULT OF EITHER NOT READING OR IGNORING THESE INSTRUCTIONS. THIS PRODUCT IS ONLY TO BE USED WITH THE ORGANIC BURN GEL PRODUCED BY JONA FIRE. BEFORE USING YOUR NEW DECORATIVE FIREPLACE, CAREFULLY READ THROUGH THE INSTRUCTIONS. KEEP THESE INSTRUCTIONS CLOSE AT HAND AND STORE THEM FOR LATER USE!

SAFETY INSTRUCTIONS FOR JONA FIRE PRODUCTS:

FOR YOUR OWN SAFETY, FOLLOW THESE INSTRUCTIONS TO AVOID DAMAGE TO YOUR PERSON OR POSSESSIONS.

When using your decorative fire place, please be careful to handle the open flames **ONLY in a safe and responsible manner!**

The JONA Fire decorative fireplace and all of its parts become very hot during use. Do not allow any flammable materials to touch the fireplace. Do not leave the hot or burning decorative fireplace unattended. Children and pets should be kept a safe distance away. The fireplace is not a toy! The fireplace should only be used by adults and authorized users that have fully read and understood the instruction manual and safety instructions. During the period of time in which you use the fireplace, including lighting the fire, extinguishing the fire or allowing the fireplace to cool, do not touch any part of the metal or glass on the fireplace. Do not lean over the fireplace while it is burning, neither with your body or your face. Never refill or top off the fuel while the fireplace is in use. The fuel cannister must be completely cool before you can refill it. Do not tip, move, or attempt to transport the fireplace during use. Do not tip, move, or attempt to transport the fireplace when it is full of fuel. Do not refill the fuel during use or during the cooling phase. Avoid shaking the fireplace, and spills. If the temperature in the area where you are using the fireplace is 5°C or under, the glass cylinder needs to be pre-warmed before use. This will prevent the glass from splintering or shattering due to temperature shock.

TIPS FOR SETTING UP AND USING YOUR JONA FIRE PRODUCT:

Our products are appropriate for both indoor and outdoor use due to the protective glass cylinder. Many fire products that are not protected by a glass cylinder (**fireballs, torches and**

fireplaces) are solely meant for use outdoors and are **only meant to be used with condensed burn gel!** Please take care to choose a safe and level place to use your fireplace! The base of the torch must be securely fixed to or in the ground. Fireballs and torches that are not made of aluminum (but instead are made of nickel plated wire or powder-coated steel) can rust and should only be used outdoors (for example in your garden, yard, or large planters). All outdoor products can only be used with JONA Fire's Organic Crystal Burn Gel. All indoor products can only be used with JONA Fire's Organic-Ethanol "FIANOL". Take care that you have enough room to safely set up your product. Keep enough distance away from easily flammable or temperature sensitive objects such as curtains and furniture. Do not tip or transport the decorative fireplace while it is burning. Do not tip or transport the decorative fireplace while it is filled with fuel. Do not leave unattended. Take care that there is a good flow of oxygen on the premises while the fire is burning. Avoid asphyxiation! Do not use in unventilated rooms! Avoid drafty areas while the fireplace is in use. Keep in mind that if left unattended, the fireplace could tip over and start a fire!

LIGHTING THE FUEL:

Only use this product with the "JONA-GEL" Cristal Burn Gel made by JONA Fire.

YOU CAN PURCHASE HIGH QUALITY BURN GEL AND ORGANIC ETHANOL AND FIND OUT MORE INFORMATION ABOUT OUR PRODUCTS AT:

WWW.JONA-FIRE.DE

Please pay close attention to the fuel's safety instructions when using the fuel! No other material should be burned in our products. The fuel should be completely burned up or the fuel canister should be completely empty after use to avoid the buildup of flammable gases! Take care that no fuel is spilled near the firepit. If any fuel spills, carefully and immediately wipe it up with a towel. Wipe the area again with a cloth dampened with water afterwards. Always fill the fuel canister away from the fireplace. Add the fuel canister to the fireplace only after it has been filled. Fill the fuel canister to a maximum of 3 centimeters under the top rim. Do not overfill! If you do accidentally overfill the canister, empty it before you light the fire. Make sure the fuel is at room temperature before use. Depending on the temperature, it may take some time before the flames have reached their maximum high. Only use suitably long matches or a long-handled lighter to light the fire. Never spill the fuel! In the event that you have spilled the organic ethanol outside of the fireplace, or if it has overflowed, do not light the fire! Wait for a long enough period of time that the fuel has totally dried up or evaporated. When not a trace of fuel is left, the fireplace is safe to use again. Caution: there is a danger of deflagration due to the buildup of gasses on the fireplace. Take care to check the fireplace to make sure that the fuel canister is sitting correctly in position before lighting the fire. Only use fuel made by JONA Fire. Please be very careful when lighting your fireplace. Fill the combustion chamber only $\frac{3}{4}$ full before each time you light the fire. Never mix your fuel with another material. Allow the fuel chamber to

completely cool before adding additional fuel. Additionally, allow the rest of the fuel to completely cool before refilling.

GENERAL SAFETY TIPS FOR USING OUR ORGANIC ETHANOL OR BURN GEL:

The organic ethanol or burn gel made by JONA fire is extremely flammable! Store only in the closed original packaging. Store in a cool and dry area. Avoid direct sunlight. Do not ingest! In case of swallowing, immediately seek medical attention and bring the sticker from the bottle or the bottle with you. Keep away from children! Reduce the opening to the fuel container with the help of the extinguisher provided until the flame has been put out. Never put out the fire with water! Our organic burn gel is produced and certified in Germany. For more information, please write to us.

MAINTENANCE, USE AND CARE:

Carefully check your decorative fireplace and each of its parts for damage or defects. This includes the fuel canister. Use the decorative fireplace only in perfect condition! Allow the fireplace to cool completely before cleaning. Before cleaning, make sure that there is no fuel left in the fuel canister! Any dirt or debris can be gently cleaned away with a moist, soft towel and a mild cleanser. Finally, wipe the product with a dry towel. Do not use an aggressive cleanser!
